Beauty at its truest

EURO- LAMINATES

With industry-leading one-to-one grain reproduction, capture the beauty of exotic wood—without cutting down trees.

REPRODUCE THE LOOK AND FEEL OF REALISTIC WOODGRAIN, CONCRETE, OR MATERIAL DESIGNS

*with enhanced performance benefits
and characteristics.*

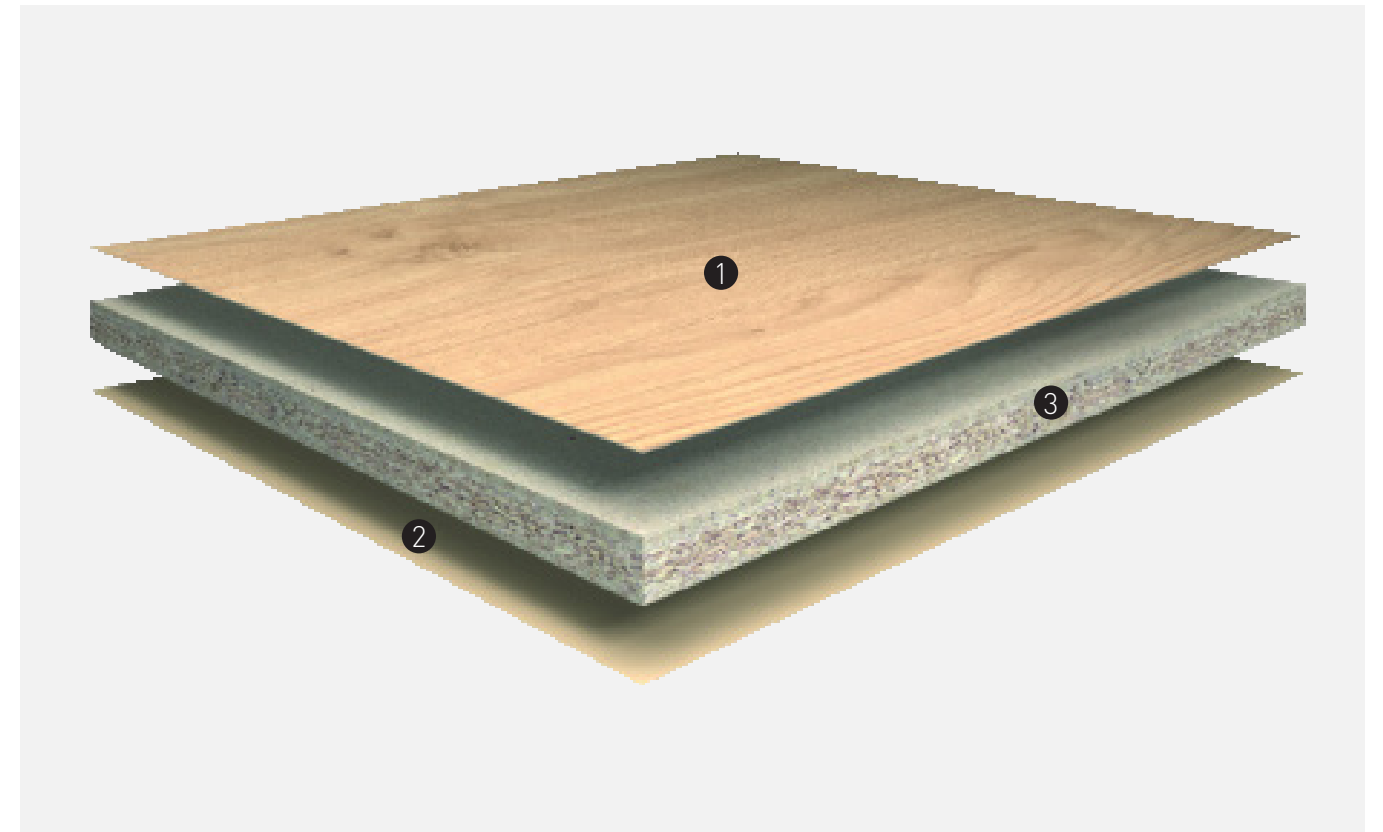

Our Eurodekor TFL particleboard is produced by fusing resin-impregnated decor paper directly onto both sides of our Eurospan Particleboard substrate. Heat and pressure activate the resin to effectively seal the substrate.

TFL is appropriate for residential, healthcare, hospitality, retail and other commercial settings.

- Cabinets
- Closet Systems
- Office Furniture
- Store Fixtures
- Architectural Wall Paneling

Your benefits

- A pre-fabricated panel only requiring cutting and edge banding
- Impact and wear
- Fade resistant
- The decor paper is permanently fused to the substrate and won't peel away

EURO-LAMINATES \

OUR EURO-LAMINATES ARE IDEAL FOR MID- TO HIGH-TRAFFIC SURFACE AREAS, CURVED APPLICATIONS AND AREAS IN NEED OF POSTFORMING

standard laminates only

Product construction

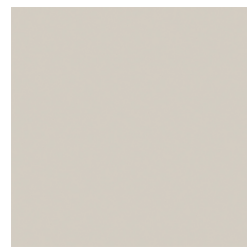

1.	Overlay (for printed decors)
2.	Impregnated decorative paper
3.	Impregnated Soda kraft paper
4.	Balancer paper

Our laminates offer a multi-layer construction, with a layer of resin-infused decorative paper on the surface and multiple layers of kraft paper in the core. Laminates must be bonded to a substrate, such as particleboard or MDF, during the finishing process.

Laminates are ideal for a variety of residential and commercial applications, such as:

- Tabletops and desktops
- Countertops and backsplash panels
- Cabinets
- Door elements and wall claddings

ACCESSORIES \

Designed for life.

SPECIFICATIONS

Crafted to the highest standards, every detail meets the mark of excellence
— from premium materials to precision engineering.

THE NEFF DIFFERENCE

Construction

European Frameless, with full overlay doors/drawer fronts, NEFF has a unique approach to construction. Our panel system attaches sections of varying thickness to exposed cabinets ends and provide a furniture quality fit and finish.

Steel Conformat screws (dowels) with no glue/staples are used in assembly, and full top and bottom weight bearing with sides (gables)

between provides the ultimate in strength and structural integrity (ideal for carrying the load of heavy countertops).

Owing to the screwed construction, cabinet boxes can be easily disassembled, modified (on-site obstacles/pipe chases, etc.) and re-assembled, staying square during delivery and installation.

Cabinet Interiors

All plywood, 3/4" Baltic Birch (layers running lengthwise and crosswise bonded with very low VOC/98% formaldehyde free phenolic resin). A recessed 1/2" full height back panel (recessed back with hanging brackets to accommodate a hanging rail*).

Fixed and adjustable shelves are stacked 3/4" thick, with tight and consistent 1/8" (3mm) reveals/spaces between all doors/drawer fronts allowing for bind free opening/closing of all facings and a very high-end, sleek look.

*Optional hanging rail facilitates expedited leveling/ assembling of Upper cabinets.

Concealed Hinges

Blum, Soft-close, 6-way adjustability, attached directly to cabinet gables/walls.

Adjustable Cabinet Levelers

Easily adjustable up/down from the standard of 4" (102mm).

Drawer Box and Slides

NEFF exclusive, Metal or dovetail wood. Slides are premium Blum, steel, side mounted, full extension, featuring Blumotion soft-close. Side to side, up/down, front/back adjustability.

Patented Dry-Fit Process

Installs, fully assembles and stages the cabinet boxes into NEFF's custom-built staging areas ensure functionality and precision.

NEFF Plywood with Pre-Finished Veneer

DOOR

Natural Veneer Cladding with choice of Finishes

- UNO technology performs and exceeds to American Architectural Manufacturers Association's publication numbers.
- UNO HD can produce varying degrees of gloss. Custom colours are available in both conventional and Low VOC options.
- Offers heat management coatings using special pigment technology. This reduces heat absorption in dark colours and lowers surface temperature strain, providing coatings with longer service life.
- Recommended for use on prepared aluminum, steel, plastics and composite substrates.

BASF Automotive Paint

- UNO technology performs and exceeds to American Architectural Manufacturers Association's publication numbers.
- UNO HD can produce varying degrees of gloss. Custom colours are available in both conventional and Low VOC options.
- Offers heat management coatings using special pigment technology. This reduces heat absorption in dark colours and lowers surface temperature strain, providing coatings with longer service life.
- Recommended for use on prepared aluminum, steel, plastics and composite substrates.
- Along with its full palette, NEFF offers bespoke colours and the ability to colour match any custom paint. Baked on through a resoundingly integrative process, we only use BASF automobile paint, the very same ones used on Bentleys and private jets. They are durable, easy to clean and of the finest quality—finished in matte, silk or high-gloss.

Experience The

PERFECT APPROACH.

NEFF's departments are staffed by industry specialists who use proven techniques and focus on detail, driven by a culture of continuous improvement. Their automated systems and patented dry-fit process, monitored by a Staging Completion Checklist, ensure precision and accountability in product installation.

The Staging Completion Checklist involves a thorough review by stagers, technicians, and design experts to verify that dimensions, finishes, functionality, and accessories meet NEFF's high standards before proceeding to the next stage.

The checklist, signed by all involved, spans from design to installation, with any concerns or notes documented for the installer to address when setting up the product in the client's space.

A large, stylized number '8' is centered on the page, rendered in a dark gray color. The '8' is composed of two thick, curved lines that meet at the top and bottom, creating a central void. The background is solid black.
